ENS Paris-Saclay, room 1U56

---

# Masters 2 Research at ENS-P.S.

- Make a **start** on a scientific domain for which **you feel inclined**
- **Acquire** a specialized scientific culture
- Foster your **skills**: autonomy, analysis, communication, etc.
- **Pioneer** a field with high impact
- **Represent** ENS Paris-Saclay

---

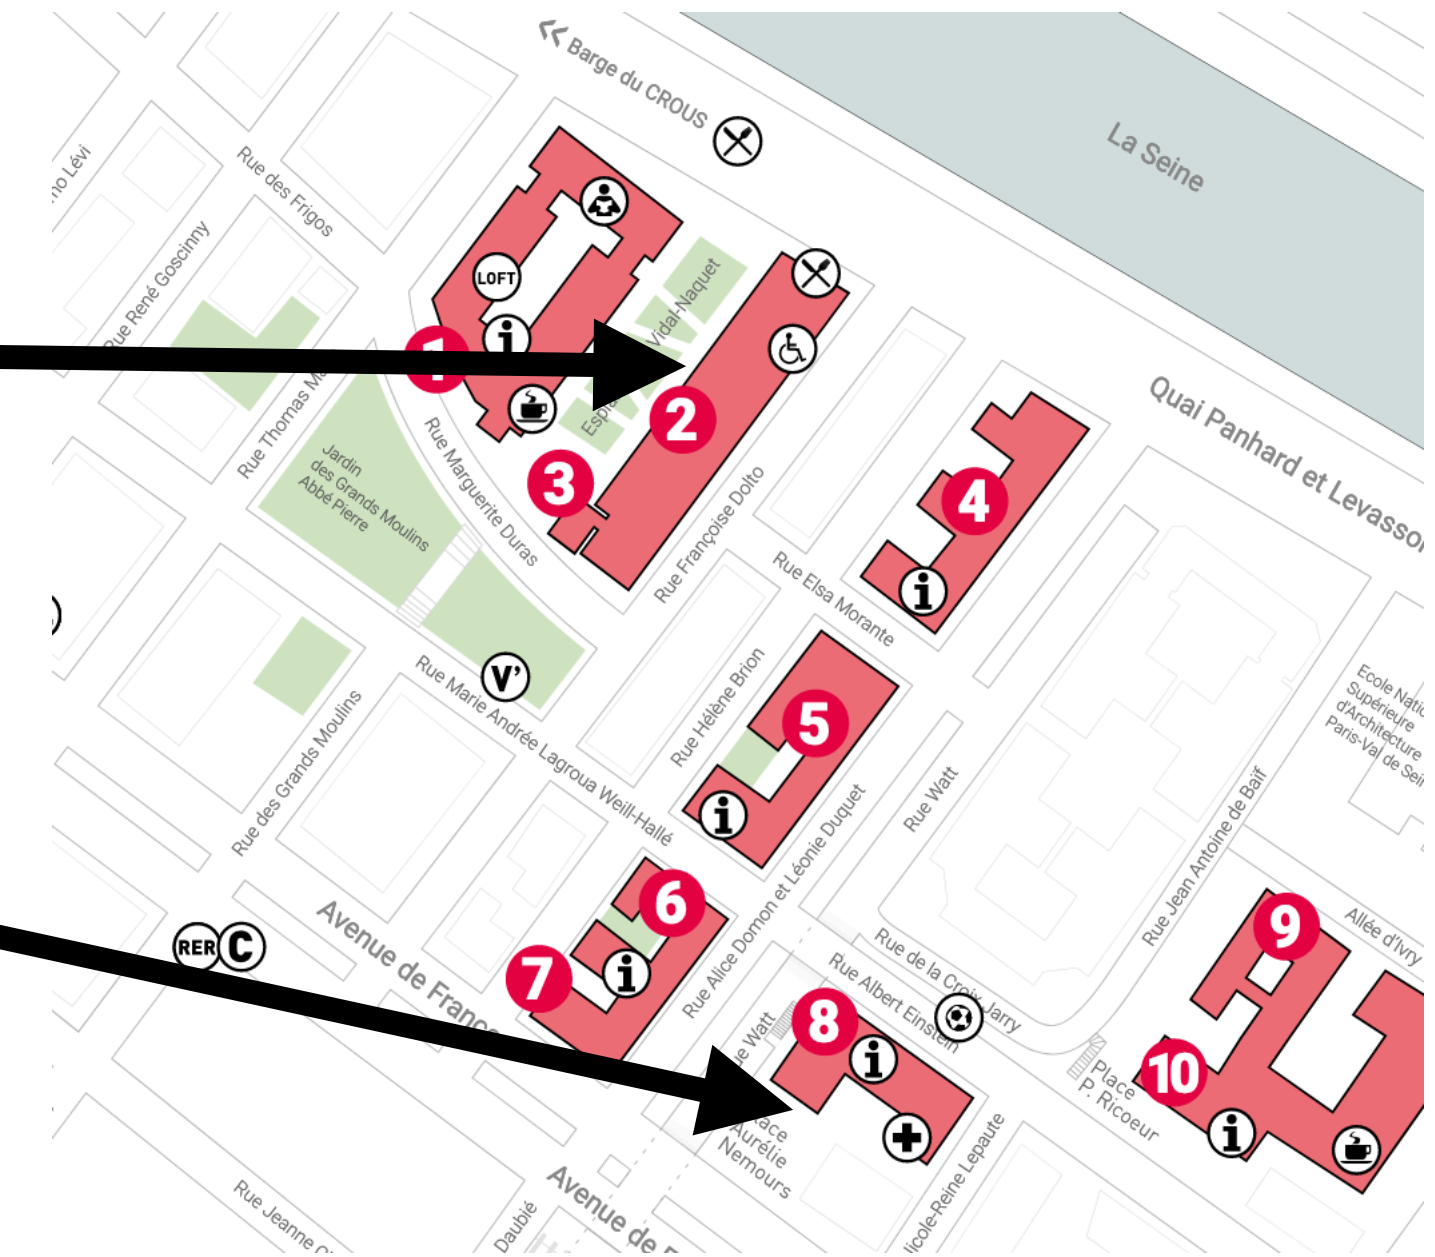

# Possible Tracks in *Computer Science*

- **MPRI:** Master Parisien de Recherche en Informatique  
Université de Paris, ENS Paris, Université Paris-Saclay, IPP
- **MVA:** Mathématiques, Vision et Apprentissage  
ENS Paris-Saclay
- **MPI:** Master Recherche Informatique  
Graduate School, Université Paris-Saclay
- **LMFI:** Logique, Mathématique, et Fondements de l'Informatique  
Université de Paris
- **STL:** Master Informatique parcours « Science et Technologie du Logiciel »  
Sorbonne Université

# MPRI

- MPRI is the default masters program for computer science students hence let me concentrate on it
- MPRI meeting: Monday, September 11th, 2023, 10h  
amphithéâtre 12E  
Halle-aux-Farines  
RER C / M14 Bibliothèque François Mitterrand  
Tram T3 Avenue de France
- Courses will take place in building Sophie Germain

# MPRI Modules

- Two kinds of courses:        **full** courses: 48 hours, 6 ECTS   |   **half** courses: 24 hours, 3 ECTS
- List of modules on **pedagogical server**:  
      <https://wikimpri.dptinfo.ens-cachan.fr/doku.php?id=cours:cours2>

- *Logic and models of computation*
- *Programming languages*
- *Algorithms and complexity*
- *Proof theory and automated verification*
- *Data science*

|        |                  |
|--------|------------------|
| 2•1    | Kesner           |
| 2•2    | Melliès          |
| 2•3•1  | Haucourt         |
| 2•3•2  | Palamide         |
| 2•8•1  | Bellia           |
| 2•8•2  | Bouyer           |
| 2•16   | Picantin         |
| 2•20•1 | Zielonka         |
| 2•20•2 | Berthé           |
| 2•40   | Tasson           |

| 2•27•1 | Schmitz          |
| 2•29•1 | Naserasr         |
| 2•29•2 | Sozio            |

---

# How to choose a course at MPRI (1/2)

- Make a diverse but **coherent** choice, before **September 30th**  
I will talk with each of you, individually, during the month of September
- ... totalling **≥30 ECTS** — aim for a bit more, say 33 or 36
- ... with **≥18 ECTS** from MPRI level 2 courses — ≥24 in order to be ranked (→ PhD grants)
- put them on the pedagogical server
- Other courses taken from other masters + MPRI level 1 courses (M1)  
Coherence, **not redundancy**
- **Approval required** (by JGL)

---

# How to choose a course at MPRI (2/2)

- Make a diverse but **coherent** choice  
Choose a **main theme**, and secondary courses
- Other courses can be taken from other masters + MPRI level 1 courses (M1)  
Coherence, **not redundancy**
- Try the courses for the first two weeks
- Keep some time to work by yourselves  
*you will need it*
- Check evaluations of former students  
and fill one at the end of the course

# Validation, ranking

- **Validation:** exams  $\geq 30$  ECTS + internship;  
**no repeating the M2 year (pas de redoublement)**
- **Ranking** (for PhD funding programs):  
 $\geq 24$  ECTS from MPRI level 2 (M2) courses (**only!**)

- **marking** algorithm:

| Course | mark | ECTS |
|--------|------|------|
| A      | 14.5 | 6    |
| B      | 8.0  | 6    |
| C      | 17.5 | 3    |
| D      | 12.0 | 6    |
| E      | 0.0  | 3    |
| F      | 16.0 | 6    |
| G      | 11.5 | 6    |
| H      | 12.5 | 3    |
| I      | 13.0 | 3    |
| J      | 15.0 | 6    |

sort  
→

| Course | mark | ECTS |
|--------|------|------|
| C      | 17.5 | 3    |
| F      | 16.0 | 6    |
| J      | 15.0 | 6    |
| A      | 14.5 | 6    |
| I      | 13.0 | 3    |
| H      | 12.5 | 3    |
| D      | 12.0 | 6    |
| G      | 11.5 | 6    |
| B      | 8.0  | 6    |
| E      | 0.0  | 3    |

sum to  
 $\geq 30$  ECTS

Cut here  
(courses G, B, E  
are ignored)

- if between 24 and 30 ECTS, just take all grades into account
- **Note:** leaving a course may help you obtain higher marks, but increases risk of failing the masters

---

# Choosing an internship

- Validate **whatever** masters program you choose
- Start looking for an internship as **early** as you can, typically November
- Meet several potential advisers, e.g., after class — at least 3
- Announces on **pedagogical server** / from other institutions / advice from friends / teachers / etc.
- **Ask JGL**—I can help
- Do not just ask about scientific matters, but also:
  - availability of adviser
  - possibility of continuing with a PhD (including possibility of funding)
  - work environment (meet the rest of team, PhD, postdocs)
  - be sure there is **some research content** (especially in industry)

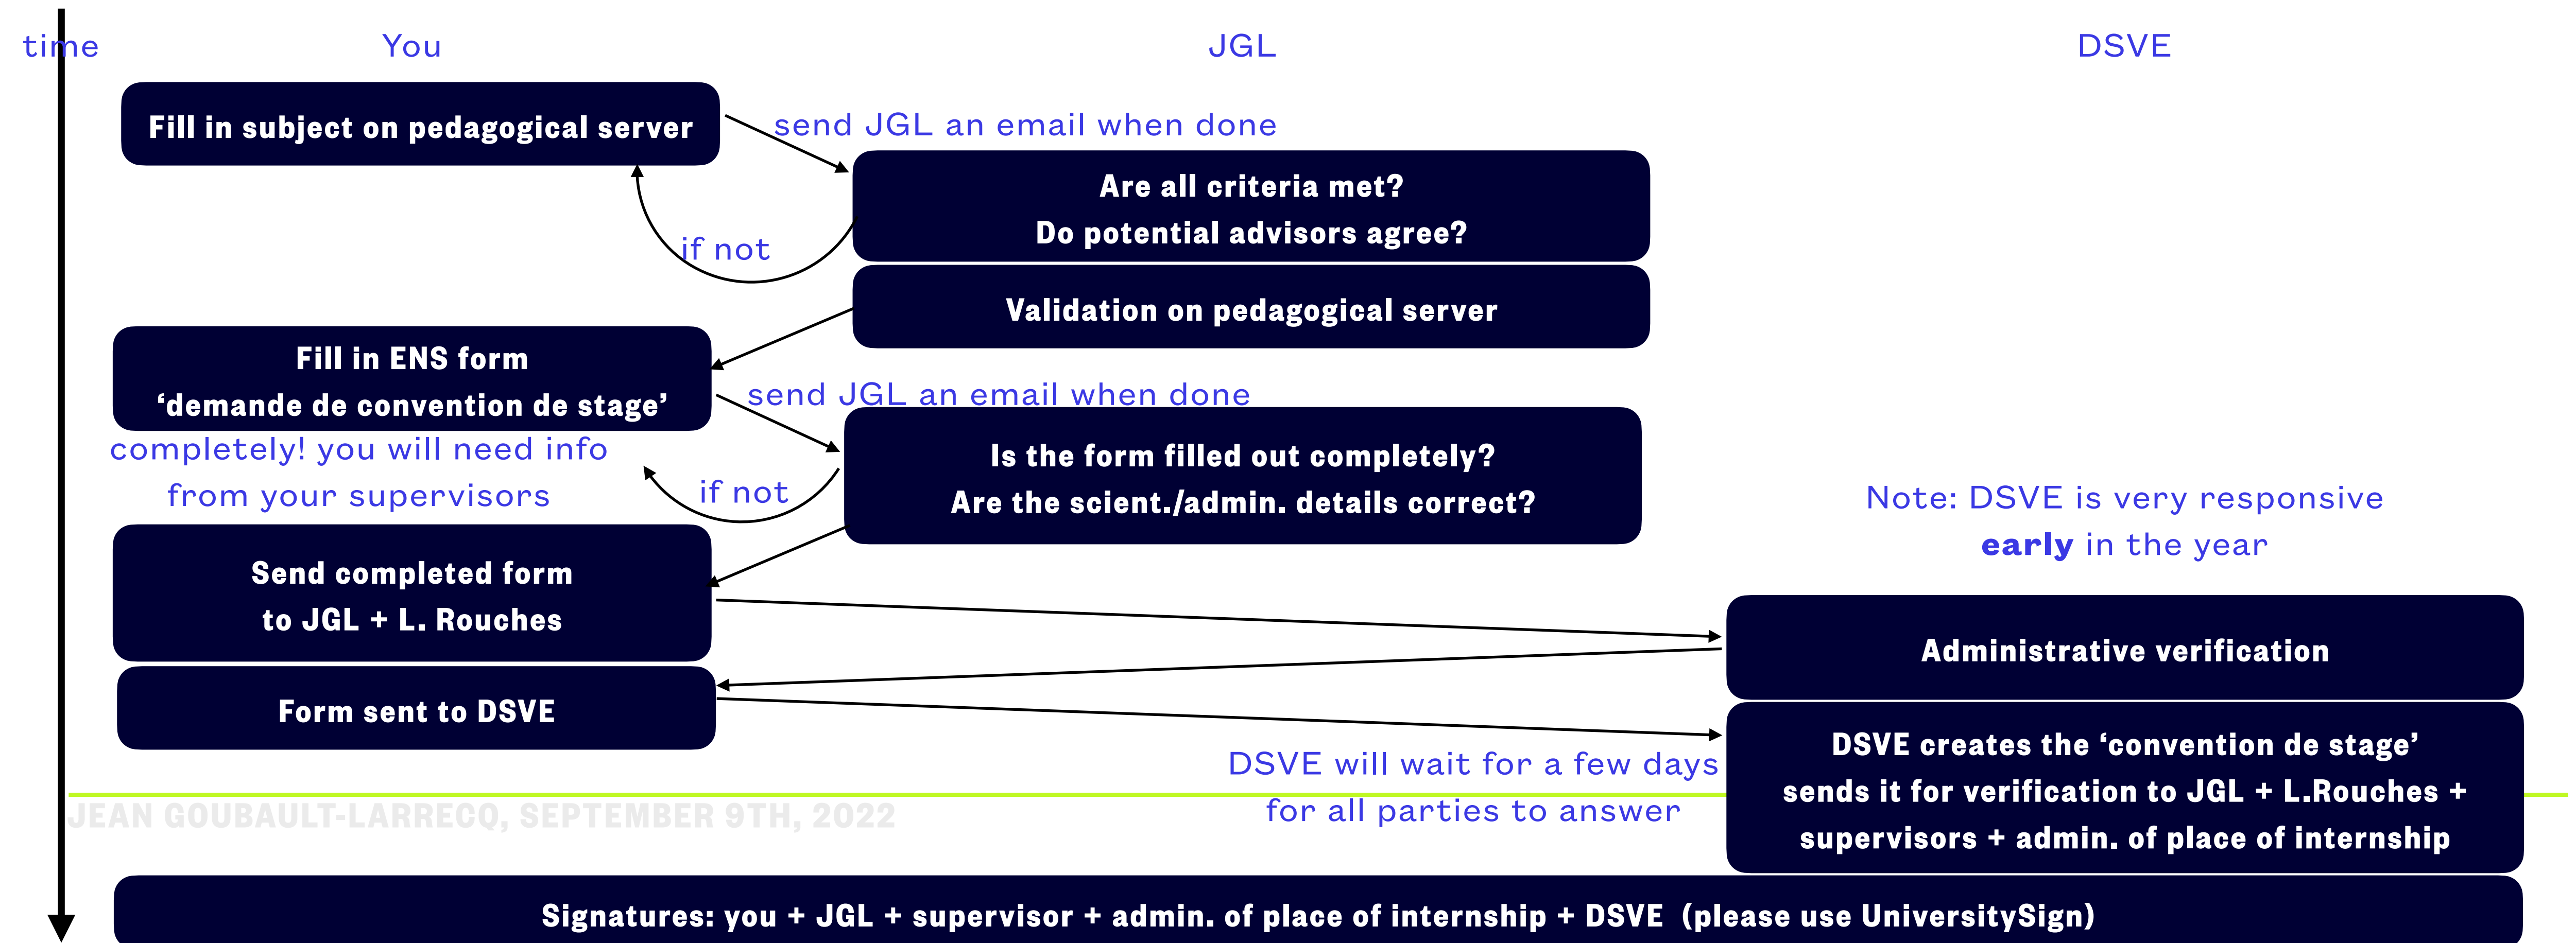

---

# Approval of internship

- **December:** send choice of internship to JGL, with **rationale**
- **January:** approval by JGL, after discussion. Main constraints:
  - Topic is **precise** enough
  - Adviser is **scientifically** acceptable
  - Time period matches
  - **At most 1** MPRI M2 student **per adviser** in any given year
  - [**At most 3** ENS Paris-Saclay students **per lab** in any given year — mostly obsolete]
- **Internship agreement** (convention de stage): see with ENS Paris-Saclay, needed for Diplôme  
Must be signed **before** internship starts; **takes time!** lots of steps, which you don't see

# Approval of internship

- **Internship agreement** (convention de stage): see with ENS Paris-Saclay, needed for Diplôme  
Must be signed **before** internship starts; **takes time!** lots of steps:

---

# During the internship

- Track early **signs of failure**  
Beware of everlasting « does not quite work yet but should be OK in a few days » syndrome
- **Talk** to your colleagues, tutors, teachers, PhD students, postdocs
- **Tell** JGL about your problems — earlier is better
- Every problem has a solution,  
no matter how intricate it seems to be

---

# Writing up your report and defending

- Explore **state of the art**
- What is *your* **contribution**?
- Do not overestimate the reader  
Clear and precise definitions; no obscure notation; every choice is motivated; etc.  
*At school, the teacher knew more than you; now **you** know more, and **you** must explain*
- **Motivate** your work  
Choices made in the report are **your own**, not your adviser's
- Step back, get the **big picture**, and explain it
- Do not try to be exhaustive (exhausting?), concentrate on the **important** / **novel** points  
and stress their importance / novelty
- Turn in your report **on time**
- Defenses early September (from 1st to 7th in 2023): **check your availability and be there**  
(are you going to a workshop/conference in this period? are you starting class/a new job?)

**Each of these points will be marked**

# Fourth year students: prepare for your PhD

- For ENS Paris-Saclay students: apply to **CDSN** fellowships

<http://dpted.ens-paris-saclay.fr/version-francaise/financement-de-these/contrats-specifiques-pour-normaliens/>

- For ENS Paris-Saclay « normaliens étudiants »: **PhD track**  
open to 3rd and 4th year students of the Diplôme de l'ENS Paris-Saclay

[https://ens-paris-saclay.fr/sites/default/files/2021-02/CS%202020-12-04%20-%20point%206%20Reglement\\_PhD%20track\\_4.pdf](https://ens-paris-saclay.fr/sites/default/files/2021-02/CS%202020-12-04%20-%20point%206%20Reglement_PhD%20track_4.pdf)

- **Graduate School CS** (Computer Science) of Université Paris-Saclay

<https://www.universite-paris-saclay.fr/programme-doctoral-en-informatique-et-sciences-du-numerique-graduate-school-informatique-et-sciences-du-numerique-isn>

- Paris-Saclay is not the center of the world: apply **elsewhere**  
... elsewhere in France, in Europe, or outside Europe

---

# Third year students: prepare for your fourth year

- Three possibilities
  - Want to explore another discipline? (mathematics, linguistics, biology, physics, etc.)  
First define your **scientific project**
  - **Agrégation**: agrégation d'informatique just created  
préparations at Université Paris-Cité, ENS Rennes, ENS Lyon
  - **ARPE**: outside France, **not** your future PhD lab
  - **Année interface**

---

# Look into the future

- The M2 year will usually define what you will do during a PhD
- Your PhD years will usually define what you will do during your whole career
- What do you want to work on during your future career?
- **Now** is the time to think about it.
